

PPE

Preparation of isolation room

Policy Nos.
7, 12,
20

Action		Why?
Place the approved sticker on the door.		To inform anyone intending to enter the room of the situation and the precautions required.
Consider what equipment and supplies are required for the area and the residents care.		To decrease entries and exits to the area.
Ensure that the hand basin has sufficient soap and paper towels for staff/resident/visitor use.		Facilities for hand decontamination within the infected area are essential for effective barrier nursing.
